DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 03/09/07 is being considered by the examiner.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David on October 01, 2007.

The application has been amended as follows:

Amendment to the claims:

12. (currently amended) A method for using a liquid crystal display as a user input, the liquid crystal display having a plurality of first electrodes and a plurality of second electrodes located on opposite sides of a liquid crystal containing area, the first electrodes overlapping with the second electrodes and defining an array of liquid crystal display pixel elements, each pixel element being associated with a unique location where an associated one of the first electrodes overlaps with an associated one of the second electrodes, at least some of the first electrodes being displaceable towards the second electrodes when pressure is applied to a viewing surface of the liquid crystal display, the display having a reference electrode overlapping with the plurality of first electrodes or with the plurality of second electrodes to [[from]] form reference

Art Unit: 2629

pixel elements that are located outside of a viewable area of the liquid crystal display a sufficient distance so as not to be substantially affected by external pressure applied to the viewing surface, the method including:

- (a) selectively driving the first and second electrodes to cause the pixel elements to display an image visible from a viewing side of the viewing surface;
 - (b) sampling voltages between the first and second electrodes;
- (c) sampling voltages between the reference electrode and the plurality of first electrodes or second electrodes that the reference electrode overlaps with; and
- (d) determining based on the sampled voltages if any of the first electrodes have been displaced towards the second electrodes.

Reason for Allowance

3. The following is an examiner's statement of reasons for allowance: claims 1, 3, 4, and 7-22 are allowable for the reasons as indicated in the Previous Office Action mailed on June 14, 2007.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DUC Q. DINH whose telephone number is (571) 272-7686. The examiner can normally be reached on Mon-Fri from 8:00.AM-4:00.PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Hjerpe can be reached on (571) 272-7691. The fax phone number for the organization where this application or proceeding is assigned is **571-273-8300**.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
